

Setting up Beam Fixture.

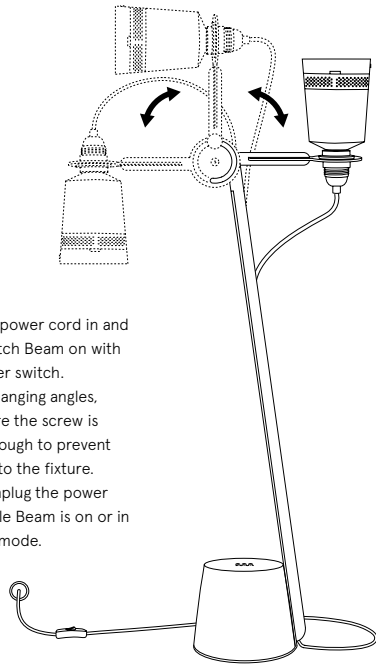

- ⚠ Never plug the power cable in when Beam is not screwed into the light socket.
- ⚠ Beam Fixture should only be used in combination with Beam, the smart light socket projector.

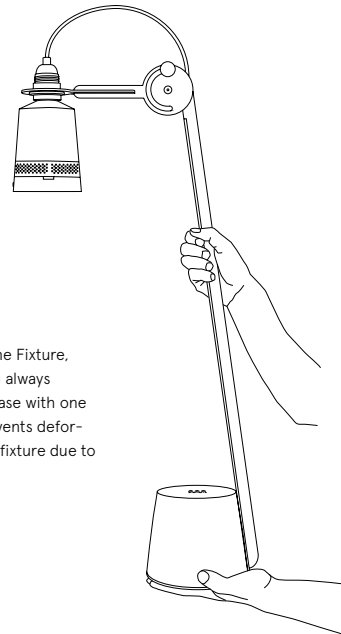

- ⚠ Never screw in a Beam without the base attached and never remove the base while Beam is screwed into the fixture. The base makes sure the Fixture does not fall over.

3

- Plug the power cord in and then switch Beam on with the power switch.
- When changing angles, make sure the screw is loose enough to prevent damage to the fixture.
- ⚠ Never unplug the power cord while Beam is on or in standby mode.

4

- ⚠ When lifting the Fixture, make sure you always support the base with one hand. This prevents deformation of the fixture due to the weight.
